

GALLARDO TALL FESCUE

FEATURES

- Superior Turf Quality – All Regions
- A-LIST cultivar for Low Input Turf and Drought Tolerance
- High Brown Patch, Gray Leaf Spot and Pythium Blight Resistance
- Dark Green Color
- Excellent Density All Seasons
- Superior Traffic and Wear Tolerance
- High Seedling Vigor

Gallardo DLFPS-TF/3550) tall fescue (*Schedonorus arundinaceus*) is an A-LIST cultivar for Low Input Turf with drought tolerance that also shows superior turf quality in all regions of the 2018 Tall Fescue NTEP trials. High resistance to the most serious diseases of tall fescue including Brown Patch (*Rhizoctonia solani*), Gray Leaf Spot (*Pyricularia grisea*) and Pythium Blight (*Pythium spp*) contribute to its performance. Gallardo was developed with a dark green color, excellent density in all seasons and the ability to withstand adversity. Superior wear tolerance and high seedling vigor make it ideal for sports turf and other high wear areas in addition to landscapes. Aggressive tillering contributes to wear recovery.

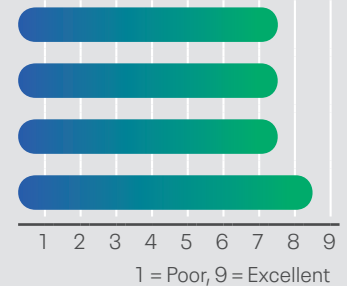

TURF SNAPSHOT

Turfgrass Quality SE

Grey Leaf Spot Resistance

Brown Patch Resistance

Drought Resistance

This variety has demonstrated superior performance while requiring reduced water, chemical and fertility inputs in A-LIST trials.

The cultivars approved for competition grade meet stringent characteristics for sports turf usage.
