

GATOR CINCO PERENNIAL RYEGRASS

- High Gray leaf spot, Superior Crown rust resistance
- Superior turf quality high or low maintenance
- Superior Wear tolerance
- Excellent Salt tolerance

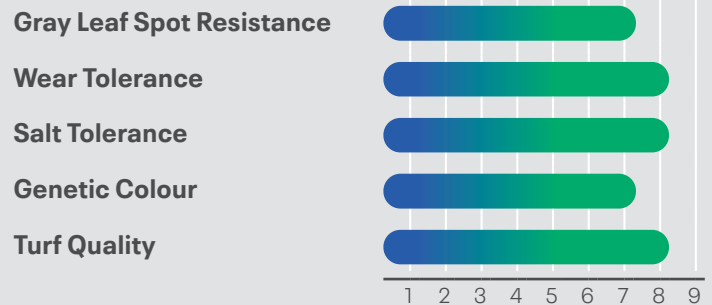

Gator Cinco (DLFPS-236/3548) diploid perennial ryegrass (*Lolium perenne*) has superior turf quality from low to high maintenance. You can trust this variety to perform from sun to shade and under wear. The high salt tolerance improves performance beside roadways and sidewalks and also where effluent water is used. High resistance to Gray Leaf Spot and Crown Rust contributes to less inputs required. Dark green color, high density and low *Poa annua* invasion insure superior performance.

ESTABLISHMENT

Seeding Rate	7-9 lbs/1,000 sq ft (30 - 50 gr/m ²)
Seeds/lb	300,000
Seeds/kg	660,000
Germination	3 - 6 Days
Mowing Frequency	1 /Week
Nitrogen Requirement	Moderate
Endophyte +	Yes

TURF SNAPSHOT

1 = Poor, 9 = Excellent

The cultivars approved for competition grade meet stringent characteristics for sports turf usage.
