# Forage

## Diamond T

COMMON NAME: Tetraploid Annual Ryegrass species: Lolium multiflorum

Diamond T tetraploid annual ryegrass was developed by OreGro research to provide a high quality, high yielding variety with world-wide adaptability. Currently used on five continents, Diamond T has proven to be an excellent short-term annual that provides forage for increased meat and milk production. High palatability with high animal intake yields more profits per acre for the livestock producer. Whether for pasture, hay, or silage, Diamond T is a proven winner that will be an asset in your forage program.

#### EARLY TO MEDIUM MATURITY

USAGE	LIVESTOCK
Pasture	Beef Cattle
Нау	Dairy Cattle
Silage	Sheep/Goats
Green Chop	Horses

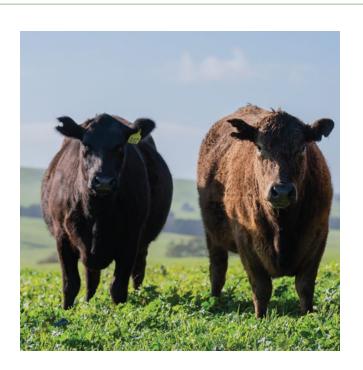

#### SEEDING RATES

Drill:	25-30 lbs/acre
Broadcast:	30-35 lbs/acre
Overseed:	25-40 lbs/acre

### Diamond T

Forage

#### COMMON NAME: Tetraploid Annual Ryegrass

SEED COUNT: 185,000 seeds/lb

#### FERTILIZER MANAGEMENT

- Always take soil test and consult your local extension service or fertilizer dealer for specific recommendations.
- Correct soil acidity, best between 5.5 and 7.
- Sowing: depending on soil test, a complete fertilizer such as 16-16-16 is helpful for establishment.
- A minimum of 30-40 units of nitrogen after each grazing or cutting will maximize forage production.

CLIMATE		MONTHS OF SOWING

2A												
3A												
3A 4A												
4C 5,6												
5,6												

#### SOIL TYPE

Adapted to a wide variety of soil types from clay loam to sandy loam. Can tolerate periodic flooding of no more than a week.

#### GRAZING MANAGEMENT

- Graze lightly when grass reaches 6 inches.
- Never graze below 3 inches.
- Short, intensive grazing is ideal.
- Avoid grazing when frozen.

#### CUTTING MANAGEMENT

- Never cut below 3 inches.
- Highest quality is at vegetative maturity.
- Optimum level of yield to quality ratio will usually maximize at boot stage.
