Turf

Escalade

COMMON NAME: Turf Type Tall Fescue species: *Festuca arundinacea*

Escalade turf type tall fescue is an improved variety developed jointly by OreGro Research and Rutgers University. With qualities such as, exceptional brown patch resistance, dark green color, and tolerance to traffic, Escalade is an excellent choice for a wide variety of turf applications such as, home lawns, parks, and sports fields.

MEDIUM MATURITY

TURF USAGE						
Home lawns						
Sports fields						
Parks						
Roadsides						
Low maintenance						

SEEDING RATES

Lawns, parks:	8-10 lb per 1,000 sqft					
Sports fields:	10 lb per 1,000 sqft					
Roadsides:	150-250 lb per acre					

Escalade

Turf

SINCE 1999

COMMON NAME: Turf Type Tall Fescue

SEED COUNT: 220,000 seeds/lb

FERTILIZER MANAGEMENT

- Always take a soil test and consult your local extension service or fertilizer dealer for specific recommendations.
- Correct soil acidity, best between 5.5 and 7.
- Sowing: depending on the results of the soil test, a complete fertilizer such as 16-16-16 at 5 lb per 1,000 sqft, is helpful for establishment.
- Applying 1 lb of nitrogen per 1,000 sqft four times per year will keep the turf a pleasant green color. One of the applications should be made in the late fall.

CLIMATE	MONTHS OF SOWING											
ZONES	J	F	Μ	Α	Μ	J	J	А	S	0	Ν	D
2B												
3A, 3B												
4A, 4B												
3C, 4C												
5A, 5B												

SOIL TYPE

Adapted to a wide range of soils from clay loam to sandy loam. Soil should have adequate surface drainage.

IRRIGATION MANAGEMENT

- Sowing: Keep soil uniformly moist until grass has emerged. Reduce watering, depending on weather conditions.
- Maintenance: Depending on weather conditions, irrigate as needed to prevent wilting and dormancy. Irrigating deeply and infrequently will force deeper rooting and enhance drought tolerance.

MOWING MANAGEMENT

- Healthiest mowing height is between 3 and 4.5 inches.
- Mow when no more than 1/3 of the leaf blade is removed.
- Sports fields may be mowed shorter for short periods of time.
- Roadsides/low maintenance: mow once per year up to once a month. Mow higher for better turf resilience.
